

Polyclonal Antibodies

Goat Anti-Chicken IgG (H+L), Fractionated

Product Code : 00-ABD-MM-CHK-001

Goat Anti-Chicken Serum is a polyclonal antibody, which is generated by immunising the goats using chicken serum as an immunogen. Anti-Chicken Serum antibody detects chicken serum proteins. Anti-chicken serum antibody is used in research in the field of parasitological and virology research. It is also used in immuno-precipitation techniques such as immunoelectrophoresis (IEP) and ouchterlony to identify serum proteins, by the presence or absence of a particular protein. These can also be used as secondary antibodies in a variety of immunological assays.

ACCEPTANCE CRITERIA

Goat

Chicken IgG

Fractionated

Clear, off-white to pale yellow liquid without any
suspended particles

≥ 1:8

3 years

Tris saline with 15mM NaN₃, pH 7.4 ± 0.2

50 to 150 mg/ml

Monospecific when reacted with chicken antigen

7.0 to 8.0

2 to 8 °C

*Buffer composition can be customised as per the customer requirements. Product can be further customised as per the specific requirements.

For research use or further manufacturing purposes only
